Bhaskar S

Senior Full Stack Developer · Machine learning in production

Bengaluru, India · bhaskar0210s@gmail.com · bhaskar0210s.github.io/me · github.com/bhaskar0210s · linkedin.com/in/bhaskar0210s

I've spent nearly nine years building Shoptree, a cloud point-of-sale, inventory and ordering platform for restaurants and retailers. I'm the lead contributor to its core platform, I built most of its ordering apps, and I've shipped machine learning to production since 2021. I also build fast on my own: six native open-source Mac apps in October 2026, made with Claude Code. Next, I want to work full-time on AI safety research.

~9 years	4 in 5	6	9.75
building Shoptree	of platform commits since 2022	open-source Mac apps, Oct 2026	CGPA at IIT Madras so far

EXPERIENCE

Shoptree Technologies Pvt Ltd — Jan 2018 – present

Senior Full Stack Developer · Bengaluru

Cloud point-of-sale, inventory and ordering platform for restaurants and retailers. Laravel (PHP), Vue 3, MySQL, Redis, AWS and Docker.

- Lead contributor to the core platform: about 4 in 5 commits since 2022 (2,075 of 2,690), and 80% in 2026.
- Built the customer and staff apps almost single-handedly: online ordering, table ordering, the waiter app and the kitchen management system (Vue 3).
- Cut running costs by about half by optimising key database queries and system workflows.
- Designed the inventory and management systems to scale and to plug cleanly into other applications.

Machine learning in production — Dec 2021 – present

- Automated inventory with machine learning: demand forecasting and stock-level optimisation in production, with less manual work and fewer over- and under-stock situations.
- Built a chatbot with OCR that reads documents in real time to automate inventory work.
- Built churn-prediction models that flag at-risk customers for retention.

EDUCATION

IIT Madras — 2026 – present

BS in Data Science and Applications (online degree). CGPA 9.75 after four foundation courses: S grades in Mathematics I, Computational Thinking and English I, and an A in Statistics I. In progress: Statistics II, Mathematics II, Python and English II.

BMS College of Engineering, Bengaluru — 2013 – 2015

Engineering coursework, four semesters. CGPA 8.5.

National Pre-University College, Jayanagar — 2011 – 2013

Physics, chemistry, mathematics and electronics: 95%. Karnataka CET state rank 671.

SKILLS

Software	PHP and Laravel · JavaScript, Vue 3, React and Node.js · Python · MySQL and PostgreSQL · Redis · Docker · AWS
Machine learning	PyTorch · TensorFlow · CNNs, transformers, GANs and VAEs · RAG · agents with Google ADK, MCP, LangChain and LangGraph
Native apps	C++, Swift and Rust on macOS, built with Claude Code

OPEN SOURCE

Native Mac apps published in October 2026, made with Claude Code. Small, fast and free.

Usage? github.com/bhaskar0210s/UsageQ — C++
Shows Claude Code session and weekly limits, pace and spending in the Mac menu bar.

Mouse github.com/bhaskar0210s/mouse — C++
Settings for the Logitech MX Master 3S over Logitech's HID++ protocol: 2–3 MB of memory, against about 180 MB for Logi Options+.

Crumb github.com/bhaskar0210s/crumb — Swift
Clipboard history for the Mac: about 500 KB on disk and 7 MB of memory, with signed releases and a Homebrew tap.

Watcher github.com/bhaskar0210s/watcher — C++
CPU, memory, GPU and sensors in one menu bar item: 200 KB on disk, about 10 MB of RAM.

Revs github.com/bhaskar0210s/revs — Rust
Line-by-line Git history for the Zed editor, as a 0.77 MB language server.

Marky github.com/bhaskar0210s/marky — Swift
A Markdown reader that typesets LaTeX math natively, without a web view.

Revise bhaskar0210s.github.io/revise — Web
Week-by-week revision for seven IIT Madras courses, with interactive statistics and linear-algebra labs. Works offline.

MACHINE LEARNING & AI

Restaurant Squad github.com/bhaskar0210s/restaurant-agent — Agents
A multi-agent restaurant assistant (reservations, orders, payment) built with Google's Agent Development Kit and MCP.

MicroGPT reasoning model — PyTorch
A small transformer with chain-of-thought reasoning steps, inspired by OpenAI's o1.

NotebookLM-style workspace github.com/bhaskar0210s/notebooklm-clone — RAG
Chat with and summarise your own documents.

Handwritten digit recognition bhaskar0210s.github.io/Hand-Written-Recognition — CNN
A CNN trained in PyTorch that runs in the browser with TensorFlow.js, predicting as you draw.

AirCursor github.com/bhaskar0210s/air-cursor — Vision
Moves the pointer with your fingertip, using Apple Vision hand-pose tracking.

brain-dot-md github.com/bhaskar0210s/brain-dot-md — LLM memory
A brain-inspired, five-layer memory system for long-running LLM agents.

ALSO

Languages	English, Kannada and Telugu; basic Hindi
Interests	AI safety, and how minds work: psychology and the brain
Volunteering	Helping children learn through local education initiatives
